The following list contains plants from France. Botanica refers to plants from different regions in France. The plants are harvested either from cultivation or in the wild.

Botanica processes the corresponding plants into extracts which are available in different carrier substances (water-soluble, oil-soluble etc.) - see extract finder. These extracts can be used for cosmetic and technical purposes.

Botanica neither performs nor commissions tests on animals. Our raw materials are natural and can vary slightly from harvest to harvest without affecting the quality of the product. Further information can be found in the corresponding specification.

Please note that some plants are not available all year round. Please ask us about the availability. This list is not exhaustive and represents only a part of our plants. If you are looking for specific extracts for your formulation, we are looking forward to your contact.

From Provence, Camargue and Corsica

Provence, Camargue and Corsica are located in the southeast of France. Provence is best known for the diversity of its landscapes, which range from the southern Alps to vineyards and lavender fields as far as the eye can see. Camargue is bordered by two estuaries of the Rhone Delta. Corsica - a mountainous island in the Mediterranean - is a mixture of dense forests, steep peaks and paradisiacal seashores. Due to the different altitudes, a great variety of plants can be found.

English	Latin	German	Bio
Apple, Redlove	Malus Domestica	Apfel, Redlove	No
Curry Plant	Helichrysum Italicum	Strohblume	Yes
Fig	Ficus Carica	Feige	Yes
