Botanica[®]
An Evonik company.

My plant extracts, naturally

The following list contains extracts, which Botanica considers complete. In each case, several parts of a plant (for example leaf, flower, root, juice) are used for extraction. This produces extracts in which the various ingredients of a plant are reunited.

The following products can be used for cosmetic and technical purposes.

Botanica neither performs nor commissions tests on animals. Our raw materials are natural and can vary slightly from harvest to harvest without affecting the quality of the product. Further information can be found in the corresponding specification.

Please note that some products are not available all year round. Please ask us about the availability. This list is not exhaustive and represents only a part of our products. If you are looking for specific products for your formulation, we are looking forward to your contact.
