

Product list milks & emulsions

Botanica GmbH • Industrie Nord 14 • 5643 Sins • Switzerland • www.botanica.ch • +41 41 757 00 00

The following list contains milks and emulsions. Milky products of animal origin are called milk, other products are called emulsions. Milk is a white, turbid mixture of proteins, lactose and milk fat in water. Emulsions are based, for example, on lecithin, an emulsifier that helps to mix insoluble liquids such as water and oil. Milky mixtures reflect light and scatter in all directions. Our eye perceives these reflexes as white.

The following products can be used for cosmetic and technical purposes.

Botanica neither performs nor commissions tests on animals. Our raw materials are natural and can vary slightly from harvest to harvest without affecting the quality of the product. Further information can be found in the corresponding specification.

Please note that some products are not available all year round. Please ask us about the availability. This list is not exhaustive and represents only a part of our products. If you are looking for specific products for your formulation, we are looking forward to your contact.
