My plant extracts, naturally

The following list contains Fairtrade plants, which are made of plant materials bought from Fairtrade partners. Fairtrade essentially means that revenues from global trade transactions are distributed justly. When producers in economically disadvantaged regions are given a fair opportunity to market their products, the local working conditions and living circumstances improve drastically. Fairtrade promotes sustainable development which means that it contributes to social justice, economic development, environmental protection, and maintaining cultural diversity, all of which strengthen local markets.

Botanica processes the corresponding plants into extracts which are available in different carrier substances (water-soluble, oil-soluble etc.) - see extract finder. These extracts can be used for cosmetic and technical purposes.

Botanica neither performs nor commissions tests on animals. Our raw materials are natural and can vary slightly from harvest to harvest without affecting the quality of the product. Further information can be found in the corresponding specification.

Please note that some plants are not available all year round. Please ask us about the availability. This list is not exhaustive and represents only a part of our plants. If you are looking for specific extracts for your formulation, we are looking forward to your contact.
